

## PRIMAL DEFENSE® KIDS

### Why does your child need probiotics?

Probiotics are living microflora that play a critical role in maintaining good health by supporting normal bowel function and a healthy immune system.

Probiotics maximize the benefits of a healthy diet by supporting normal absorption and assimilation of nutrients in the gut.

Certain probiotic blends help support normal gastrointestinal balance of good and potentially harmful bacteria.

### How is Primal Defense® Kids different from other probiotic formulas?

- Primal Defense® Kids contains a 4 billion\*\* live cell count of four species of beneficial probiotic cultures.
- It contains a unique *Bifidobacterium* blend with the probiotic *Saccharomyces boulardii*, that supports healthy intestinal epithelium lining integrity, the front line of the body's defense system.†
- Its three species of *Bifidobacteria*: *Bifidobacterium breve*, *Bifidobacterium infantis* and *Bifidobacterium longum*, are all found in a healthy child's digestive tract and have all been clinically studied in children, as has *Saccharomyces boulardii*.
- Primal Defense Kids is made with organic banana so your child will enjoy taking it.
- Gluten Free

### Why should you use Primal Defense® Kids for your child?

Primal Defense® Kids can be used effectively and safely by children aged three years and older.

A diet high in processed and refined foods can cause a lack of beneficial microorganisms in the digestive system. Any child who consumes such a diet can benefit from Primal Defense® Kids.†

### Supplement Facts

Serving Size 1.28 grams (approx. 1/4 tsp) Servings Per Container 60

	Amt. Per Serving	%DV <sup>1</sup>	%DV <sup>2</sup>
